

AWHONN Advanced Fetal Monitoring Course

The Advanced Fetal Monitoring course expands on the knowledge and physiological principles presented in the AWHONN Intermediate Fetal Monitoring Course. This course uses a case study approach to focus on the analysis of maternal-fetal physiology related to complex clinical information and fetal heart rate tracings. The course emphasizes the physiology of fetal-maternal oxygenation, the interpretation of tracings, the selection of clinical interventions, and perinatal risk-management principles.

Learning Outcomes:

- Describe the physiologic principles of maternal and fetal oxygen transfer as they apply to principles of fetal heart monitoring
- Appraise the fetal response to maternal pathological and physiological adaptations during the labor process
- Analyze complex case studies and tracings using standardized terminology
- Apply perinatal risk management principles, communication techniques, and documentation strategies to complex and challenging patient care scenarios

Nursing Contact Hours/CME Credit:

7 nursing contact hours/7 CME credit available through January 31, 2025 (0.75 hours may be used towards pharmacology hours).

Course Format:

- in-person online

An optional knowledge integration test is available. Nursing contact hours/CME credit will be awarded after the online evaluation is completed and is required to receive nursing contact hours/CME credit for the course. Eight-hour day includes breaks and lunch.

Cost:

- **AWHONN Registration Fee - \$110.00** – Advanced Student Materials with scratch-off coding to access online knowledge integration test is included with the purchase of materials through Kendall Hunt. Course ID number is required with purchase.
- Current AWHONN *Fetal Heart Monitoring Principles & Practice Textbook*, if you don't have access to the textbook (\$76.96 print or \$64.95 ebook).

Date and Time:

November 13, 2024, 8am to 430pm

Via zoom

Host Fee: \$50 (does not include Student materials)

Registration:
