Successful Completion Requirements to obtain 6 Nursing Contact Hours

✓ Live, in-person

In order to obtain nursing contact hours, you must attend the entire activity, participate in audience polling and/or Q&A, and complete the course evaluation.

Financial Relationship Disclosures

No relevant financial relationships were identified for any member of the planning committee or any presenter/author of the program content.

Learning Outcomes:

Following this course, learners will have increased competence and confidence in their ability to recognize common physical exam findings of neonates with congenital heart disease as well as pre-transport stabilization knowledge and skills

Course Objectives:

1. Describe the physical assessment and differential diagnosis of neonates with suspected congenital heart disease (CHD).
2. Discuss the anatomic features, clinical presentation, and initial stabilization of neonates with CHD.
3. Identify the modifications in the S.T.A.B.L.E. guidelines that are necessary when caring for neonates with CHD.
