

The S.T.A.B.L.E. Program

Post-resuscitation stabilization
and care of the ill neonate

Program Outcome:

Participants will gain an increased understanding of how to care for critically ill newborn infants prior to transport to a tertiary care center as evidenced by passing The S.T.A.B.L.E. Program post-tests.

Course will be taught by registered
Lead STABLE Instructors
of the S.T.A.B.L.E. Program

*** A pre-test will be mailed to you after your
registration is received**

***Registration Deadline is Mon, September 26**

*** Bring your STABLE Program Learner/
Provider Manual (6th ed.) AND your
completed pre-test to the course**

STABLE Learner/Provider Manuals ©2013
(\$49.95 + S/H) may be ordered at
www.stableprogram.org

The S.T.A.B.L.E.® Program, was developed in 1984 by Kristine Karlsen, M.S., R.N.C., N.N.P., and has been distributed internationally. The curriculum is reviewed by a multidisciplinary editorial board of expert neonatal care professionals and undergoes extensive research based evaluation. It is highly recommended as a supplement to the AAP/AHA Neonatal Resuscitation Program®.

Loyola University Health System (OH-346, 6/1/2017) is an approved provider of continuing nursing education by the Ohio Nurses Association (OBN-001-91), an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

This activity is being offered for a total of **8 contact hours** for nursing.

All speakers and the planning committee members have declared no conflict of interest.

Criteria for successful completion and receipt of contact hours for this educational activity include:

- (1) Learner's signature on attendance sheet
- (2) Learner attending the program in its entirety
- (3) Learner submitting a completed evaluation form at the conclusion of the program

The S.T.A.B.L.E. Program is an educational tool for community hospital care-givers, developed to serve as a concise guideline for the pre-transport stabilization and care of sick newborns. The program is designed for the period following successful resuscitation of the newborn.

All hospitals need to be prepared for a newborn who becomes sick and requires post-resuscitation stabilization and/or transport. Before arrival of the transport team, community hospital care-givers should anticipate, recognize, and effectively correct problems as they arise. The goal of all transport teams is to transport a well-stabilized infant, minimizing adverse outcomes. This goal is best achieved when stabilization is promptly and effectively initiated by community hospital caregivers.

Intended Audience for the S.T.A.B.L.E. Program

- ✦ Registered Nurses
 - Labor and Delivery
 - Postpartum
 - Nursery & Special Care Nursery
 - Emergency Department
 - Midwives
- ✦ Respiratory Care Therapists
- ✦ EMTs & Paramedics
- ✦ Physicians
 - Pediatricians
 - Emergency Medicine
 - Family Practice
- ✦ Any community hospital care provider involved in stabilization of the neonate prior to transport
