

Fundamentals of Fetal Monitoring

Thursday, May 9, 2024 from 0800-1630

This course is designed for nurses who work in the State of Illinois, and are new to fetal monitoring with at least two weeks of fetal monitoring experience to one year of experience in caring for the antepartum and intrapartum patients.

Class will be held virtually via WebEx

(link and handouts will be emailed the week before class to the email used at registration)

Participants must have access to a computer that has a microphone & video camera. Video camera will be required to be on for the duration of the course

Presented by Hannah Klamm, BSN, RNC-OB, C-EFM (Northwest IL Administrative Perinatal Center and Myra Sabini, BSN, RNC-OB, C-EFM (Northwestern Administrative Perinatal Center)

Objectives:

- Identify the purpose of fetal monitoring
- Identify the components of the fetal heart rate and associated physiology
- Describe fetal monitoring baseline characteristics using the National Institute of Child Health and Human Development (NICHD) terminology and criteria.
- Differentiate characteristics of Category I, II, and III patterns
- Explain the instrumentation for fetal heart and uterine activity monitoring.
- Explain various methods of antepartum testing
- Discuss the common nursing interventions related to fetal heart rate patterns and related maternal physiology
- Discuss the components of nursing documentation, legal issues and communication

This CNE activity is being offered for 7.75 contact hours

Mercyhealth is approved as a provider of nursing continuing professional development by the Wisconsin Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

Criteria for Successful Completion: Attending entire program with audio & video camera on, submission of post-test with a score of >80% and evaluation. The planners and faculty have declared no relevant financial relationships
